

Mul-T-Lock[®] Interactive[®] + Platform

Advanced key technology

Mul-T-Lock's Interactive[®]+ platform builds on the foundation and innovation of the Interactive system, adding new features for enhanced effectiveness.

Mul-T-Lock's latest patent-pending technology protection is currently only available through the platform's unique pin design in Interactive[®]+ cylinders.

- ▶ Interactive[®]+ increases security effectiveness with a telescopic pin tumbler mechanism that requires the simultaneous alignment of both internal and external shear lines for plug rotation.
- ▶ Featuring enhanced intrusion protection, Interactive[®]+ is highly pick, drill and bump resistant.
- ▶ Coded key cards and service through trained and authorized Mul-T-Lock[®] Interactive[®]+ dealers help prevent unauthorized duplication
- ▶ Available in all formats and product types — retrofit cylinders, padlocks, locks and multi-point locks — one key can fit them all.
- ▶ Master keying capabilities allow users to design the system they need
- ▶ Backwards compatibility provides existing Interactive users the flexibility to expand their systems seamlessly and migrate to Interactive[®]+ at their own pace

Mul-T-Lock[®] Interactive[®]+ Platform meets the world's most stringent standards.
