

Function

A CLIQ® key with a transponder for electronic access control systems;

Allows users to conveniently use a single all-in-one key for opening both electromechanical cylinders and doors secured by RFID access control systems.

Applications

Facilitates installation and use of electromechanical platforms in apartment and office buildings, seniors' homes and other premises secured with RFID access control systems.

Recommended for new applications that combine a mechanical Mul-T-Lock® platform, and an Interactive®+ CLIQ®/MT5® CLIQ® system, with access control solutions, such as Mul-T-Lock's SMARTair®.

Features

- Key head may incorporate round sticker transponders.
- Compatible with mechanical Mul-T-Lock® platform Interactive®+, as well as the electromechanical Interactive®+ CLIQ®/MT5® CLIQ®.
- Compatible with electronic RFID access control systems, such as Mul-T-Lock's SMARTair®.

Specifications

- Users can design their own SynerCLIQ cover sticker.
- Transponder dimensions: 22 mm diameter

Transponder
