About Mul-T-Lock®

Mul-T-Lock® is a worldwide leader in developing, manufacturing, and marketing high-security locking products and access control solutions for institutional, commercial, industrial, and residential applications.

Mul-T-Lock® is fully owned by the ASSA ABLOY Group, a global leader in access solutions with a proven track record in helping billions of people experience a more open world through innovations that enable safe, secure, and convenient access to physical and digital places.

Adhering to the world's most stringent standards, Mul-T-Lock® products are sold via 20,000 authorized service centers, supporting over 300 million customers worldwide.

MUL-T-LOCK®

MUL-T-LOCK®

CLIQ®

MTL™CLIQ
The Comprehensive Access Control Solution

MTL™CLIQ
An electromechanical locking and access control solution that combines patented high-security mechanical protection with wireless access control.

MTL™CLIQ grants you the flexibility you need

Flexible access rights management

Locks can be individually programmed with time-limited access

Flexible management is enhanced via audit trails and automated reporting

Permanent or temporary access rights can be assigned with speed and ease

Easy administration

The CLIQ system allows you to choose from multiple intuitive managment options, including:

Desktop software (CLIQ local manager)

Web manager (CLIQ web manager)

User-friendly mobile apps (CLIQ Connect, CLIQ Go)

MTL™CLIQ® system can integrate with Mul-T-Lock's wide range of high security wire-free locking products such as cylinders, locks and padlocks, which meet the highest water & dust resistance standards.

Improves your organization's security & efficiency

Electronics and mechanical systems can be combined to save money without compromising security. The master key solutions provided by Mul-T-Lock are designed to address security requirements in an evolving and dynamic environment.

By integrating MTL™CLIQ® with the MTL™800-based master key system, you will gain a premium protection locking solution across all your assets, and an access control solution for those locations you wish to secure.

Hassle-free system

MTL™CLIQ® keys are battery-powered and can be programmed with flexible access rights and schedules. The standard battery inside every programmable CLIQ® key has a typical life of 30,000 cycles (or three years). Key battery replacement is fast and easy — no tools are needed.

Installing MTL™CLIQ® is a quick and simple process, since it is designed to fit existing doors and lock cases. The cylinders and keys are built to withstand the elements, so they can be used on interior and exterior openings and can work with a wide variety of enclosures.

CLIQ® GO APP

MTL™CLIQ® GO

For small access control systems - take control of your system anywhere, anytime using your mobile device

Designed for busy managers, MTL™CLIQ® GO saves time and puts a digital solution in the palm of your hand. CLIQ® Go app allows small and medium businesses to add a layer of access control to your assets, saving time and effort. To meet your business security needs, MTL™CLIQ® GO is based on the MTL™CLIQ® electromechanical system that combines MTL™800's premium protection with cloud-based access control.

The combination with a mechanical system enables you to only change necessary parts of your business' security system, for a higher level of cost efficiency.

CLIQ® Local Manager

Your data is safe with you

Designed for location-bound or security-concerned organizations, CLIQ® Local Manager is a locally installed offline management system.

The CLIQ® Local Manager can be deployed as a single or multi-system, allowing you to manage several smaller systems with the click of a button.

CLIQ® Local Manager gives you complete control of your premises via a PC screen.

CLIQ® Web Manager

For businesses in need of a network solution

You can remotely manage your CLIQ access control system from from any location, using a standard web browser.

Using CLIQ Web Manager, you can securely administer access control in the cloud to make your business more efficient. This solution is perfect for organizations with multiple security administrators looking for a networked access control system.

CLIQ® Web Manager is designed for unbounded system sizes, including existing systems surpassing the 200,000 cylinders and 40,000 keys - and growing.

For increased time, cost, and travel efficiencies, while enhancing organizations' security profiles, the CLIQ® Web Manager can be applied to each organization's own server, or Mul-T-Lock's hosted server and can be integrated with 3rd party applications as well.
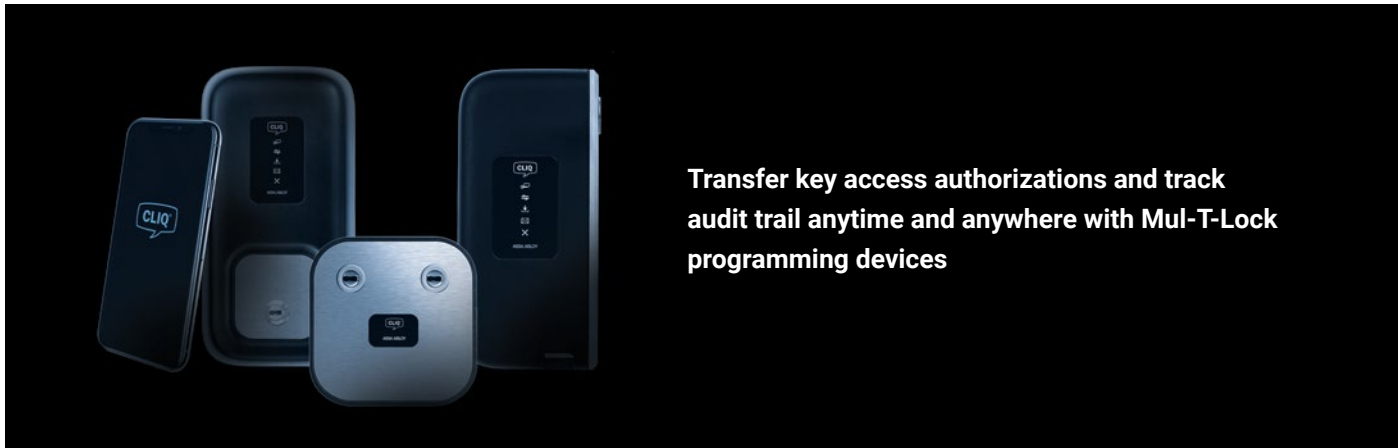

CLIQ® Remote

For geographically spread-out businesses

CLIQ® Web Manager offers a vast set of features, including the Connect feature for the MTL™CLIQ® key. CLIQ® Remote is an ideal solution for simultaneously and independently managing multiple sites via the web using the CLIQ® Connect app together with a CLIQ® Bluetooth key or a Mobile Programming device.

CLIQ® Remote addresses your high physical security needs with easy-to-use remote management and control capabilities. With CLIQ® Remote, personnel no longer need to visit the administration office to make keying changes. Respond to issues as they arise and save valuable time and manual intervention by granting access or disabling keys with several simple clicks of a button, whenever and wherever the need arises.

Transfer key access authorizations and track audit trail anytime and anywhere with Mul-T-Lock programming devices
